## Off-Air TV Reception Analysis at the Cohocton Wind Project Area in Steuben County, New York

Comsearch was contracted by Environmental Design & Research P.C. to identify all of the off-air television stations within 100-mile radius of the proposed Cohocton Wind Energy Project in Steuben County, NY. Off-air stations are television broadcasters that transmit signals that can be received directly on a television receiver from terrestrially located broadcast facilities. Comsearch examined the coverage of the off-air TV stations and the communities in the area that could potentially have degraded television reception because of the location of the wind turbines. The proposed wind energy facility boundaries and local communities are plotted in the map shown in Figure 1 of this memorandum. Table 1 lists the off-air television stations within 100 mile radius of the wind facility.

Table 1 List of Off-Air TV Channels within 100 Miles of Cohocton Wind Energy Facility

| Location         | Call Sign  | Channel | Service | Status | Distance-miles |
|------------------|------------|---------|---------|--------|----------------|
| ELMIRA           | NY WETM-TV | 2       | DS      | STA    | 41.1           |

TV-Normal Broadcast Station

DS-Digital Service Television, Temporary Operation, STA Operation

DT-Digital Television Broadcast Station

DR- Indicates Station has Applied for FCC Rule Making

GRA-Indicates Rule Making was granted by FCC

LP-Low Power Television Broadcast Station

TX-Translator Television Broadcast Station

LIC – Licensed and operational station

CP – License approved construction permit granted

APP – License application, not yet operational

STA – Special transmit authorization, usually granted by FCC for temporary operation

The most likely TV stations that will produce off-air coverage to the Steuben County, NY area will be those stations at a distance of 40 miles or less. Of the stations listed in Table 1 there are a total of 31 stations within this range, and of these, 17 are presently licensed and operational.

Fifteen of the stations are either low-power stations or translators with limited coverage. Two of the operational stations are full power and full service stations. They are Channel 48 (WYDC) and Channel 51 (WPXJ-TV). The other fourteen stations listed are either in their license application, or construction phase, but not yet operational.

Table 2 Off-air TV Channels within 40 Miles of Cohocton Wind Energy Facility

Figure 2 shows the location of the TV stations with respect to the area. Table 3 lists the communities and other locations where potential test points for the baseline off-air TV measurements may be made, if requested, in a subsequent phase of this project.

Table 3 Locations for Potential Test Points for Baseline Off-Air TV Measurements

- North side of wind energy facility
- East side of wind energy facility
- South side of wind energy facility
- West side of wind energy facility
- Cohocton

Dansville  
 Wayland  
 Prattsburg  
 Loon Lake  
 Avoca  
 Stony Brook  
 Wheeler

This area has two full service off-air TV Stations and fifteen low-power and translator stations. Based on this, it is not expected that the of-air television stations are the primary mode of television service for the local communities. TV Cable service and/or direct satellite broadcast are probably the dominant delivery mode of TV service to the wind facility's surrounding communities.
